

## How currency exchange is done now:

Currency is the most volatile and expensive financial asset: As much as 90% of FX transaction is Risk and only 10 Percent is Profit.

Basically when you are exchanging money with a traditional financial institution you are paying for the market volatility.

Profit: **10%**  
Risk: **90%** Spread

## How Currencii is better:

Being a marketplace for currency buyers and sellers we eliminate volatility risk from our accounts thus making currency exchange very inexpensive.

## How it works:

### Step1

**Registration:**

Create an account with your confidential details.

### Step2

**Transfer:**

Send your money via bank transfer.

### Step3

**Matching:**

The platform matches the seller with a buyer.

### Step4

**Transfer back:**

The money is exchanged
